## REMARKS

The foregoing U.S. Patent and Other Documents describe automatic implantable cardioverter defibrillators and similar implantable medical devices and external patient activator devices for controlling the operation of such devices by a patient in which the medical device is implanted. Several of these references are specifically discussed or mentioned in the Background of the Invention section of the above-referenced patent application.

It is thus requested that the foregoing documents be considered during examination of the accompanying Patent Application, and specifically be made of record therein.

Respectfully Submitted,

---
